Australia electric vehicle incentives

Overview

Discover all the current federal and state electric vehicle (EV) incentives across Australia for 2025, from interest-free loans and discounted rego to tax exemptions and grants. Sales of electric vehicles in Australia increased by more than 160% in 2023 compared to 2022, helped in no small part by government incentives for EV owners. In some cases, EV drivers may be able to cash in on. There are several government programs and support incentives to encourage the uptake of electric vehicles (EVs) in Australia. In 2023, more than 87,000 new EVs were sold in Australia, and in 2024 that number rose by almost 5 per cent but 2025 has seen EV sales. As Australians increasingly turn to electric vehicles for their next car purchase, many may be wondering what incentives are offered in their state or territory.
