

4 kW solar water pump for agricultural use

✓ 100KWH/215KWH

✓ LIQUID/AIR COOLING

✓ IP54/IP55

✓ BATTERY 6000 CYCLES

Overview

The 4kW solar pumping inverter, compatible with DC voltages from 120V to 400V, features forced air cooling performance and an IP20 protection rating. Farmers increasingly turn to solar-powered water pumps to irrigate fields, fill tanks, and provide reliable water in remote areas. Solar panels convert solar energy into electrical energy, connecting to a dedicated low-voltage solar pump. Easy to set up, perfect for drip irrigation and small fields. Various types of solar panels, such as monocrystalline, polycrystalline, and thin-film. By leveraging direct sunlight to power motors and deliver continuous water flow, solar water pumps provide independence from the grid and eliminate fuel costs, aligning with modern sustainable-infrastructure demands.

4 kW solar water pump for agricultural use

Solar-Powered Water Pumps for Agriculture: Reduce Costs

Solar-powered water pumps offer a transformative solution for sustainable agriculture. By harnessing the sun's energy, these pumps provide a reliable and cost-effective means of irrigation, ...
