

6-station punching for photovoltaic bracket

Overview

The utility model discloses a stamping tool for processing a photovoltaic bracket, which comprises a stamping table, wherein supporting legs are respectively fixed on the periphery of the lower end surface of the stamping table, a butt strap is fixed between the four supporting. The utility model discloses a stamping tool for processing a photovoltaic bracket, which comprises a stamping table, wherein supporting legs are respectively fixed on the periphery of the lower end surface of the stamping table, a butt strap is fixed between the four supporting. 6-station CNC punch press for photovoltaic bracket Solar bracket roll forming machine advantage. 1, Solar bracket production line for producing good quality solar pv supports, high efficiency. 2, PLC control system, automatically and easy handle. High quality pv solar bracket punching and cutting machine, Single cutting multiple times, large daily production capacity, higher efficiency than conventional automatic aluminum cutting machine and manual punching equipment Product Description Equipment Features 1. The working pressure is adjusted. JGX1412 is an Angle Punching, Marking and Cutting machine for Angles up to 140*140*12mm.

6-station punching for photovoltaic bracket

CN220239765U

The utility model relates to the technical field of stamping equipment, in particular to a stamping tool for processing a photovoltaic bracket.
