

ASEAN lithium energy storage battery

Overview

Lithium-Ion as the Anchor Technology: For ASEAN's cost-sensitive and rapidly growing markets, lithium-ion remains the most competitive, scalable, and bankable energy storage solution for the foreseeable future, backed by a proven track record and global cost reductions. In this context, Behind-the-Meter (BTM) Battery Energy Storage Systems (BESS) stands as a key enabler of this transformation, offering innovative solutions to enhance energy security, integrate renewable energy sources, and ensure stable and efficient grid operations. This paper explores the role. SynVista Energy, a leading integrated energy storage system provider and the first Southeast Asian company on the BloombergNEF (BNEF) Tier 1 list, today reflected on its successful participation at the 3rd ASEAN Battery Technology Conference, held from August 27-29. The company's leadership. The 3rd ASEAN Battery Technology Conference (ABTC) recently wrapped up at the SAii Laguna Phuket in Thailand, marking a significant step toward a unified regional battery ecosystem and accelerating collaboration in clean energy. The conference brought together over 200 stakeholders. Seoul — Researchers from the Korea Advanced Institute of Science and Technology (KAIST), in collaboration with LG Energy, have announced a breakthrough in lithium-metal battery technology that could accelerate the global transition away from gasoline-powered vehicles. It is on the brink of a battery energy storage (BESS) leap that could reshape its energy systems. The region's market is valued at around USD 3.

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

ENERGY STORAGE SYSTEM
