

# Algeria Solar-Powered Containerized Smart Type

## Overview

---

This study presents an innovative approach to thermal modeling of a solar container house in Algeria using DesignBuilder, focusing on enhancing its energy performance through targeted interventions. Algeria's abundant solar resources and Asia's rapid industrialization create unique energy challenges. Traditional grids struggle with intermittency from renewables like solar and wind. For a country receiving 3,000+ hours of annual sunshine, this storage deficit creates dangerous imbalances: Take the 120MW SKTM plant in Béchar Province. Algiers, Algeria's bustling capital, faces unique energy challenges: rapid urbanization, intermittent solar/wind resources, and aging grid. Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide.
