

# Are smart meters installed on photovoltaic panels

## Overview

---

Since 2023, a smart meter is mandatory for home owners with solar panels. That's because of the net-metering regulation. Electric meters are silent workhorses of the energy grid, the last bit of public infrastructure electricity passes through before. Installing smart meters alongside solar panels allows homeowners to accurately monitor their electricity usage and generation. Smart meters record data on electric energy, current, power, and voltage levels, helping to prevent billing discrepancies and providing insights into consumption behavior. The good news is that we can install a smart meter either way, and we're happy to talk you through your options and what's best for your specific needs. What is a Smart Meter?

A smart meter is like the heartbeat monitor of your home's energy use. You can have a smart meter and solar panels in your home, and enjoy the benefits of both because the second generation of smart meters are compatible with all solar panels.
