Watt-Hour Capacity Voltage Series-
Parallel Arrangements Top Off Each
Battery Before Physical Assembly! Why

48V Is Better Battery Cable Sizing Cable Sizing Summary Before assembling multiple batteries into a battery bank it is very important to get all the individual batteries to the same charge level. That way none of them will be overcharged while the others "catch up." Fully charge all batteries individually first, then hook them together. If you don't have an AC charger available you probably can use the See more on power.sil Instructables
