

Bahrain solar rooftop power generation system

Overview

Bahrain plans a 123-megawatt solar project, including the world's largest rooftop solar plant. The project aims to cut emissions by 90,000 tonnes in its first year of operation. The initiative aligns with Bahrain's Net Zero 2060 goal and boosts renewable energy investment. Steel-based investment company Foulath Holding and Dubai-based developer Yellow Door. Manama, Bahrain—Novem: Foulath Holding, an industrial holding company with major steel investments and the parent company of Bahrain Steel and SULB, today announced its partnership with Yellow Door Energy, the leading sustainable energy developer in the Middle East and Africa, to embark. MANAMA, Bahrain, Nov. Adding over 189,900 solar panels across 14 industrial sites, the project will generate approximately 200 million kilowatt-hours of clean energy annually, cutting carbon. The plant is part of the Bahrain industrial project, which aims for zero net emissions. During the Gateway Gulf forum in Manama, Foulath Holding and Yellow Door Energy announced the construction of the world's largest rooftop solar plant, a 123 megawatt peak (MWp) project that will position Bahrain. With a capacity of 50 MWp and 77,000 solar panels, the project is expected to become the largest single-site rooftop solar power plant globally once commissioned in 2026 Bahrain's new rooftop solar power project is set to be the world's largest single-site rooftop solar power plant.
