

Barbados energy storage and power battery organisation

Our Lifepo4 batteries can be connected in parallels and in series for larger capacity and voltage.

Overview

The Barbados National Energy Company Ltd. (BNECL), in partnership with the Inter-American Development Bank (IDB), is leading the installation of 10 MW of Battery Energy Storage Systems (BESS) across the island. The tender process will open the door for developers to bid for up to 60 megawatts. This first tranche of the competitive procurement process aims to deploy 60 MW (240MWh) of new Battery Energy Storage Systems (BESS) in Barbados, aiming to unlock renewable energy (RE) access to the grid, improve grid stability, allow better demand management, and mitigate supply interruptions. Barbados has taken a significant step toward transforming its energy landscape with the launch of the Caribbean's first competitive Battery Energy Storage System (BESS) auction — a development that could redefine how renewable energy is integrated, financed, and scaled across island grids.

BRIDGETOWN, Barbados – Barbados has launched the second phase of the competitive procurement process for Battery Energy Storage Systems (BESS), which brings the island closer to unlocking the grid and allowing for the further onboarding of renewable energy. Minister of Energy and Business, Senator.
