

Battery replacement stations in Norway

Overview

On behalf of the electric car manufacturer NIO, Omexom teams in Norway have designed, supplied the electrical infrastructure and then set up the battery replacement station itself. This charging service is the first of its kind in the world. Europe's first battery replacement station is built! In the municipality of Lier in Norway, near Oslo, the first electric car battery replacement station has been built. Shanghai-based Nio began shipping EVs to Norway in July and is aiming to establish a presence across Europe.
