

Belgian off-grid solar cabinet-based automated type

Overview

The 120 kW automatic switching cabinet integrates STS-based control, protection, and monitoring functions to enable safe and automatic grid-connected and off-grid operation. It works with energy storage cabinets and PV inverters to support stable power distribution and coordinated. Whether you're integrating solar power or need industrial-grade backup systems, discover what makes a cabinet truly "weatherproof" in Belgium's unique climate. With 200+ rainy days annually and temperature swings from -5°C to 35°C, Belgium's climate tests energy storage limits. SOFAR Energy Storage Cabinet adopts a modular design and supports flexible expansion of AC and DC capacity; the maximum parallel power of 6 cabinets on the AC side covers 215kW-1290kW; the capacity of 3 battery cabinets can be added on the DC side, and the capacity expansion covers 2-8 hours. They can be widely used in farms, animal husbandry, hotels, schools. EK photovoltaic micro-station energy cabinet is a highly integrated outdoor energy storage device.
