## ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

The image shows a tall, grey Energy Storage System (ESS) cabinet. It features two vertical green stripes running down the center. In the middle, there is a blue hexagonal shape with two black vertical bars inside. At the top right, the letters 'ESS' are printed in green. At the bottom, there are two yellow triangular warning symbols with exclamation marks.

## Overview

---

With Bhutan's techno-economically viable hydropower potential at 23,000 MW (from 90 sites outside ecological parks), solar at 12,000 MW, wind at 800 MW, and biomass at 2,700 GWh annually, the NEP 2025 sets ambitious targets: 25,000 MW total generation capacity by 2040. With Bhutan's techno-economically viable hydropower potential at 23,000 MW (from 90 sites outside ecological parks), solar at 12,000 MW, wind at 800 MW, and biomass at 2,700 GWh annually, the NEP 2025 sets ambitious targets: 25,000 MW total generation capacity by 2040. Bhutan is entering a new era of clean energy with major commitments from Adani, Reliance, and Tata to develop large-scale hydro and solar projects across the kingdom. The combined ventures — including Adani's 570 MW Wangchhu, Tata's 600 MW Kholongchhu, and Reliance's 500 MW solar farm — are set to. Bhutan's National Energy Policy 2025 (NEP 2025), released in June 2025 by the Ministry of Energy and Natural Resources (MoENR), represents a pivotal shift in the country's energy strategy. Hydropower has long underpinned Bhutan's economy, contributing significantly to revenue. 1,000 2029 5,000 Bhutan is fast emerging as a regional leader in renewable energy, with an ambitious push to expand solar. Bhutan has been a power surplus country on an annual basis, but there is a significant shift in seasonal power situation in Bhutan due to the recent changes in surging electricity demand and capacity shortage in the winter period. While hydropower remains the backbone of Bhutan's electricity generation, the policy.
