

# Big price cut for solar inverters

## Overview

---

24 per watt on a solar inverter, not including labor costs. Most solar panel contractors charge around \$50 to \$100 per hour. More efficient inverters tend to be. The price of an inverter can range from affordable entry-level models to high-end, feature-rich systems. Understanding your specific energy requirements is critical to choosing the right inverter that fits your budget. Did you know inverters account for 10%-15% of total solar system costs?

As the "brain" of photovoltaic systems, PV inverters convert DC power from solar panels into usable AC electricity. The inverter market is experiencing "growing pains" as falling prices, shifting demand and technological product changes cause problems for the sector's major Western manufacturers. However, prices vary widely by type, size, and brand: String Inverters: The most affordable option, ranging from \$800 to \$2,500. Ideal for small to medium-sized homes (3-5 kW systems) with unshaded roofs. But why the dramatic spread?

## Big price cut for solar inverters

---

### Inverter manufacturers facing 'growing pains'

In recent weeks, three major western inverter manufacturers - SMA Solar, Enphase and SolarEdge - have reported challenging financial results and job cuts.
