

Brazil Sao Paulo Energy Storage Frequency Regulation Project

Overview

Aiming at the problems of low climbing rate and slow frequency response of thermal power units, this paper proposes a method and idea of using large-scale energy storage battery to respond to the frequency change of grid system and constructs a control strategy and scheme. Aiming at the problems of low climbing rate and slow frequency response of thermal power units, this paper proposes a method and idea of using large-scale energy storage battery to respond to the frequency change of grid system and constructs a control strategy and scheme. Brazil's National Electric Energy Agency (ANEEL) has released a comprehensive technical note following Public Consultation No. 39/2023, focusing on refining the regulatory framework for Energy Storage Systems (ESS) within the Brazilian electricity sector. On Decem, ANEEL presented the results of the first phase of Public Consultation (CP) No. 296 on November 25, establishing a series of changes to laws in its electricity sector including guidelines for the regulation of storage systems, tax exemptions and the reduction of import tax rates on battery energy storage systems and its components to zero. From ESS News. At a public hearing held by the Chamber of Deputies' Mines and Energy Committee, Daniel Danna, Director of the National Electric Energy Agency (ANEEL), stated that the regulatory authority intends to introduce the country's first regulatory framework for energy storage this year.

Brazil Sao Paulo Energy Storage Frequency Regulation Project

ACCELERATING THE BRAZILIAN ENERGY TRANSITION

Establishing tailored environmental licensing procedures for PSH -- particularly for closed-loop systems -- is essential to reduce project risks, shorten approval timelines, and enable Brazil to leverage its ...
