

# Can solar rooftops generate electricity

## Overview

---

In a perfect world, the average roof in the U. can generate around 21,840 kilowatt-hours (kWh) of solar electricity annually—that's more than most homes need. But also, the world isn't perfect. Realistically, your roof's solar. Rooftop solar power has transformed from a niche technology into a mainstream energy solution, with over 4. 4 million American homes now powered by solar panels. They also have storage for extra energy, so you always have power, even when it's dark. Companies like. In the age of rising energy costs, growing environmental concerns, and increasing interest in sustainable living, solar rooftops have emerged as one of the most accessible and effective ways for individuals and businesses to generate their own electricity.

## Can solar rooftops generate electricity

---

### How Much Solar Power Can My Roof Generate?

At AP Sun Energy, we help homeowners unlock the full potential of their rooftops, ensuring optimal energy production and maximum savings. Here's what you need to know to ...
