

# Canopy photovoltaic panel installation price

## Overview

---

In the United States, commercial solar canopy systems typically cost between \$3. This estimate includes expenses for solar panels, the supporting structure, labor, wiring, and other necessary equipment. NLR's PV cost benchmarking work uses a bottom-up. Superior Economics Despite Higher Costs: While installation costs are 50-100% higher than rooftop solar (\$3.99 per watt), the dual functionality often justifies the premium. Commercial installations can achieve 7-12 year payback periods with 25-year NPVs of 2-4 times the initial investment. For a small to mid-sized home, a solar canopy will cost anywhere between \$5,000 and \$32,600. The final price depends on many factors. Companies like Brooklyn Solar Canopy specialize in prefabricated solar canopy structures, but any professional local solar company can perform the installation for. How much do solar canopies cost?

The average price of commercial solar canopies ranges \$3.
