What Is A BMS (Battery Management System)?

Our BMS does not limit the charging current, and our team always recommends a 50 amp charge rate for a 100 amp hour battery. You can charge at a higher charge rate of 100 amps in emergency ...

How do charging piles interact with the vehicle's battery management

The charging pile and the BMS use CAN to exchange information such as the available charging power, the battery's SOC, and the maximum charging current. During the communication process, the charging pile ...

Understanding Electric Vehicle Charging Piles: Common Indicators and

After the charging gun head is inserted into the slow charging interface of the car, the AC charging pile sends the AC power to the on-board charger, which converts the AC power into DC power and ...
