

# Chile gravity energy storage power station

Energy storage(KWH)

**102.4kWh**

Nominal voltage(Vdc)

**512V**

—  
Outdoor All-in-one ESS cabinet

## Overview

---

Located on the site of the former Tocopilla coal-fired power plant, the project represents Engie's first large-scale standalone battery storage facility in Chile. The 116 MW / 660 MWh Tocopilla BESS comprises 240 battery containers and 30 power conversion system (PCS) units. In María Elena, Antofagasta Region, Generadora Metropolitana —owned by AME and EDF power solutions Chile—officially began construction of Dune Plus, one of the largest energy storage projects in Chile. The initiative integrates the Dune and La Pampina projects: the first includes a 333 MW BESS. Engie Chile has completed the energization of its 660 MWh Tocopilla Battery Energy Storage System (BESS), while Trina Storage and Atlas Renewable Energy have advanced the 932 MWh Copiapó PV + BESS project - one of the largest grid-forming installations in Latin America. Generadora Metropolitana, an energy generation company jointly owned by AME. DNV acted as market consultant to support Grenergy's successful \$270 million financing for the Elena hybrid power plant. The project, a major part of the Oasis de Atacama platform, combines 77 MW of operational solar PV with a 430 MW/3. During its recent participation in COP28 in Dubai, Chile not only reaffirmed its commitment to renewable energy, but also.
