

Chile's first energy storage project

Overview

The development of clean energy in Chile took an important step forward with the inauguration of the largest battery-based energy storage system in Latin America. Construction of the system will begin in the first quarter of 2025, with commercial operations expected to begin in 2026. From ESS News Danish investment fund CIP's Growth Markets Fund II. The site, now in its initial construction phase, will be the company's first energy project in the Santiago Metropolitan Region.

Chile's first energy storage project

Engie breaks ground on 995 MWh solar-plus-storage Chilean project

The Chilean arm of French energy giant Engie has begun construction of the Libélula solar-plus-storage project and expects commercial operation before September next year.
