

# Chilean battery energy storage module prices

## Overview

---

Battery energy storage systems using lithium-ion technology have an average price of US\$393 per kWh to US\$581 per kWh. Chile's renewable energy boom has created a gold rush for cheap battery energy storage systems (BESS). 23/kWh in mining zones, businesses demand lowest-cost BESS solutions. 3kWh, highlighting their commitment to energy independence and sustainable. This momentum is reflected in the data: AMI estimates that there is a 7.7 GW pipeline of BESS projects in Chile, far and away the most advanced front of the meter (FTM) storage market in Latin America. For large containerized systems (.,100 kWh or more),the cost can drop to \$180 - \$300 p 9 MW) will likely all have storage compon does it cost to build a battery energy storage system in 2024?

Wha "s the market price for. We expect price differentials in Chile to fall as BESS-installed capacity grows and new transmission comes online adding more uncertainty to long term arbitrage revenues. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue.
