

Chilean energy storage company s new project

Overview

Energy company Generadora Metropolitana—owned by Chilean developer AME and France's EDF—starts building Dune Plus, a large-scale energy storage and solar PV complex that will strengthen grid reliability in northern Chile. Dune Plus is its first entry into battery storage. This is supported by significant projects like Greenergy Renovables' Oasis de Atacama, the world's largest hybrid solar. Engie Chile has completed 44% of construction on a 57-MW/285-MWh battery energy storage system integrated with its 344-MW Kallpa wind farm in northern Chile, marking its first hybrid wind-plus-storage project. Solar PV developer Atlas Renewable Energy has secured US\$510 million in financing for a solar-plus-storage project in Chile. This marks the largest financing.
