

# China battery energy storage system Price

## Overview

---

This report provides the latest, real-world evidence on the cost of large, long-duration utility-scale Battery Energy Storage System (BESS) projects. All-in BESS projects now cost just \$125/kWh as it in rechargeable batteries for use at a later date. When energy is needed, it is released from the BESS to power demand to lessen any he integration of demand- and supply-side management. 3 billion in 2024 and is expected to reach USD 2. 4% from 2025 to 2034, driven by the country's aggressive push for renewable energy and carbon neutrality. The nation more than quadrupled its battery fleet last year, which helped it surpass its 2025 target of 30 GW of operational capacity two years early. ESS News sat down with Ming-Xing Duan.
