

China s first wind turbine

 *easy to install and use*

 *World wide Products*

 *faster charging and discharging*

 *Multiple protection with alarm systems*

Can save energy

the battery capacity can be increased freely and flexibly according to the situation of home use.

Rechargeable lithium batteries use safe LiFePO₄

Overview

Developed by SAWES Energy Technology, in cooperation with Tsinghua University and the Chinese Academy of Sciences, this floating turbine, known as the S1500, represents the world's first megawatt-scale airborne wind energy system. The world's first 20-megawatt (MW) wind turbine, which is capable of powering more than 44,000 times a year, has finally been connected to the Chinese's grid. The 300-megawatt wind power project is located in Akqi County, Kizilsu Kirgiz Autonomous Prefecture, in northwest China's Xinjiang Uygur. A pioneering project from China is pushing the boundaries of renewable energy: a 1-megawatt airborne wind turbine shaped like an airship, designed to function at around 1,500 meters altitude.

China s first wind turbine

World's first urban-use mW-class high-altitude wind turbine completes

World's first megawatt-class urban-used high-altitude wind power system - the S2000 Stratosphere Airborne Wind Energy System (SAWES) - completes its test flight in Yibin, Southwest ...

Product Model
 HJ-ESS-215A(100KW/215KWh)
 HJ-ESS-115A(50KW 115KWh)

Dimensions
 1600*1280*2200mm
 1600*1200*2000mm

Rated Battery Capacity
 215KWH/115KWH

Battery Cooling Method
 Air Cooled/Liquid Cooled
