

China s own wind power generation

Overview

As of late November 2025, China's installed wind power capacity had exceeded 600 million kilowatts (kw), accounting for approximately 46 percent of the world's total, far surpassing that of the second-ranked United States. China's wind and solar power installed capacity totaled 1,840 GW at. The wind turbine can generate enough electricity to power 44,000 homes each year. With 117 GW of new installations worldwide 2024 marked.

China s own wind power generation

China's installed wind power generation capacity tops world for 15

China's installed wind power generation capacity has consistently ranked first in the world for an impressive 15-year streak, according to the latest data released by the China Electricity Council on Sunday.
