Overview

Collector cable: Typically RWU90 copper or aluminum in a variety of AWG sizes (Type PV Listed, UL 4703, CSA C 72. 277) Power cable: Typically concentric neutral, copper or aluminum; most commonly 15 kV and 35 kV. A solar combiner box is a crucial component in solar energy systems, designed to consolidate the outputs of multiple solar panel strings into a single output that connects to an inverter. Learn how improper cabling caused a 23% efficiency loss in California's recent solar farm project. You know, 38% of photovoltaic (PV) system failures. Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I, V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems. Engineered with quality and field serviceability in mind, our commitment to excellence extends to every detail. From the selection of high-performance components to adequate internal.
