

# Comparison of a 40-foot folding shipping container and a traditional generator

## Overview

---

Mobile 20ft and 40ft BESS containers now provide flexible, scalable energy storage with deployment times reduced by 80% compared to traditional stationary installations. Advanced lithium-ion technologies (NMC and LFP) have increased energy density by 40% while reducing costs by 35%. Group represents a pioneering, flexible, and effective solution in energy provision. This design makes it easy to transport and install, providing an efficient means of generating electricity for various uses, such as construction sites, events, or backup power in. A commercial generator for your 20ft or 40ft refrigerated shipping container will give you the protection and peace of mind you need.
