

Components of photovoltaic DC combiner box

Overview

These parts are DC circuit breakers, DC fuses, surge protection devices, busbars, and enclosures. Each part helps keep your solar system safe. Stops the flow of electricity if there is too much or if there is a short circuit. Cuts off bad circuits, so other strings can. ance cables by combining strings at the array locat ciency, reliability and safety in solar energy systems. The PV combiner box components keep the. The solar combiner box is like a junction box, which combines all the outputs from the solar panels into one line, and then uniformly inputs into the inverter, which reduces the number of wires and saves material costs. " Each string produces DC electricity.
