

# Construction Specifications for Photovoltaic Energy Storage Equipment

## Overview

---

The Building Energy Efficiency Standards (Energy Code) include requirements for solar photovoltaic (PV) systems, solar-ready design, battery energy storage systems (BESS), and BESS-ready infrastructure. A solar PV system is prescriptively required for all newly constructed. Added "Photovoltaic mounting systems for solar trackers and clamping devices used as part of a grounding system shall be listed to UL 3703 or successor standard. " to reflect updates in UL standards 2. Added language about warranties for clarity including specifying expectation that PV modules. Visit USA. government is responding to Winter Storm Fern. 14, Solar Photovoltaic S 7-1 ing at, in aggregate, equal or exceed the size of the proposed project.

## Construction Specifications for Photovoltaic Energy Storage Equipment

---

### Solar Photovoltaic: SPECIFICATION, CHECKLIST AND GUIDE

The RERH specifications and checklists take a builder and a project design team through the steps of assessing a home's solar resource potential and defining the minimum structural and system components ...
