

# Corrosion-resistant folding containers for oil platforms

## Overview

---

FRP tanks & vessels have excellent corrosion resistance and can be used to store hydrochloric acid, sulfuric acid, sodium hydroxide, methanol, vegetable oil and other corrosive media. In addition, they feature high strength, lightweight and long service life. Temporary Tanks are collapsible liquid storage containers designed for temporary or portable use. Our specially developed container solutions provide optimal protection and efficiency for gensets and engines in extreme offshore and onshore environments. To mitigate this risk, our folding containers are constructed from high-quality steel that is coated with a corrosion-resistant paint or galvanized to provide an additional. FRP tanks & vessels are containers manufactured by filament winding process with fiberglass as reinforcing agents and resin as binder. This means IBC oil/chemical totes or drums are set up high.
