

Cypriot schools use modular outdoor cabinet earthquake-resistant type

Overview

Only 19 schools across the north have been renovated to become earthquake-resistant in the last 22 months, despite funds having been allocated to renovate a total of 127, opposition party CTP 'MP' Feliz Besim said on Monday. She was speaking in 'parliament' as the issue of inadequate school. Since the earthquake in Turkey on Febru, only 19 out of 127 schools in the Turkish Republic of Northern Cyprus (TRNC) have been renovated to meet seismic safety standards. In many schools where buildings were deemed unsafe, classes are still being held in temporary structures. This. Focusing on resilience and sustainability, the new model aims to ensure that learning infrastructure and spaces can withstand natural disasters like earthquakes and climate impacts such as flooding and storms. Governments and NGOs should continue investing in this adaptable infrastructure to ensure that education remains uninterrupted, even in the most. In Cyprus, after the three earthquakes that occurred in 1995, 1996, and 1999, the Cyprus State, acting in a pioneering way internationally, has decided the seismic retrofitting of all school buildings, taking into account the sensitivity of the society towards these structures, which house the. In Cyprus, after the three earthquakes that occurred in 1995, 1996, and 1999, the Cyprus State, acting in a pioneering way internationally, has decided the seismic retrofitting of all school buildings, taking into account the sensitivity of the society towards these structures, which house the.
