

Do photovoltaic panels attract pigeons

Overview

Do Solar Panels Attract Pigeons?

The answer is yes, and here's why: Solar panels provide a warm surface that is particularly inviting during colder days and nights. Solar panels have become a popular choice for renewable energy, offering numerous environmental and financial benefits. However, they can also attract unwanted guests: pigeons. The issue arises because the installation creates a sheltered, elevated void between the panel array and the roof surface. This newly formed cavity offers an ideal habitat that provides. Pigeons have become a common sight on rooftops, especially those equipped with solar panels.
