

# Do photovoltaic panels need an electricity meter to use electricity

## Overview

---

All owners of a grid-tied solar system will need a bidirectional utility meter to monitor the electricity the system transfers to the grid. When you install solar panels, your home will not only draw power from the grid but also send excess energy back to it. To accurately measure this two-way flow of electricity, you need a compatible. The short answer is: it depends on what type of meter you already have, and how your local utility manages solar energy.

## Do photovoltaic panels need an electricity meter to use electricity

### If You Have Solar Panels, Do You Need Electricity?

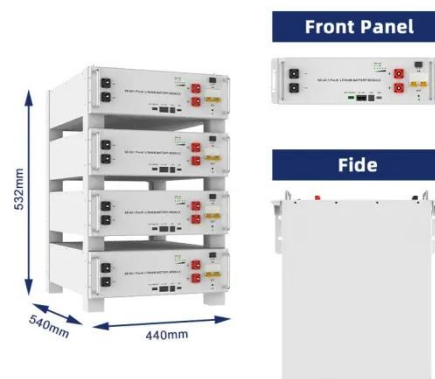

Managing the flow of power between the solar panels, the battery, the home, and the grid requires a specialized piece of equipment called a hybrid or battery-enabled inverter.
