

Does Switzerland export solar modules

Overview

As per Volza's Switzerland Export data, Solar, cells, modules export shipments from Switzerland stood at 34. This chart shows electricity production and national consumption in Switzerland over a period of ten years - from January 2014 to December 2024. The seasonal pattern has shifted slightly over the past two years, not least. This small nation offers a rare opportunity for a solar module manufacturer to gain tariff-free access to two of the world's most stable and lucrative markets—the European Union and Switzerland—from a single production base. In 2024, the United Kingdom was the largest destination for extra-EU exports of wind turbines and second largest for solar panels and liquid biofuels. These facts are updated till 22 Jul 2025, and are based on Volza's Switzerland Export data of Solar, cells, modules, sourced from 90+. Solar energy, which reaches the earth's surface in the form of light and heat and can be actively utilised in a variety of ways: with the aid of photovoltaic systems for electricity production, through the use of solar collectors for heat production (hot water and auxiliary heating) or through the. Solar power in Switzerland has demonstrated consistent capacity growth since the early 2010s, influenced by government subsidy mechanisms such as the implementation of the feed-in tariff in 2009 and the enactment of the revised Energy Act in 2018. As of 2024, solar power contributes 5.

Does Switzerland export solar modules

Switzerland Adopts Solar Stewardship Initiative for Solar Imports

Switzerland now requires solar module importers to comply with the Solar Stewardship Initiative (SSI), setting a new precedent for ESG and supply chain transparency. Learn what this ...
