

ESS energy storage system framework

Overview

The proposed national policy framework would cover the development, commercialisation, and utilisation of energy storage systems (ESS) to support grid reliability, renewable energy integration, and power supply security. The legislation positions energy storage as a core enabler of grid reliability. The Philippines House of Representatives has passed a national framework for energy storage systems. The legislation, House Bill 6676 or the Energy Storage Systems Act, passed on its third and final reading on February 4, as announced by the national Press and Public Affairs Bureau. But what exactly is an ESS, and how does it work to deliver these benefits?
