

# Electric vehicle policy copenhagen

## Overview

---

Since BEVs benefit from reduced registration tax, this leads to lower taxable value and BIK for employees. Employer-paid electricity for workplace charging is exempt from tax. Plug-in hybrid vehicles face a DKK 30,000 surcharge in the BIK calculation, while BEVs benefit from. Denmark will end public subsidies for electric vehicle charging from July 1, closing a Covid-era tax break that has supported free charging stations across the country. Starting with the new year, electric and hydrogen-powered cars and motorcycles will not be able to benefit from free parking on the territory of the Danish capital anymore. This was stipulated in the budget agreement for 2024 and now the city is looking to fill back its coffers with fees from. Key policies and measures that support the deployment of electric and zero-emission vehicles The table highlights current as well as announced key policies and measures that support the deployment of electric vehicles (EVs) and zero-emission vehicles (ZEVs) by region and country. Investigation of the underlying policy and market dynamics is critical.
