

# Electricity distribution argentina

## Overview

---

This report discusses the power market structure of Argentina and provides historical and forecast numbers for capacity, generation, and consumption up to 2035. [2] It relies mostly on thermal generation (60% of installed capacity) and hydropower generation (36%). 45 quads in 2022, lower than the 3. The reduction in energy consumption was curbed by a 0. Under Law No 24,065, the power industry is divided into three segments: (i) generation, (ii) transportation, and (iii) distribution, with general and specific regulations for each segment, as well as limitations on the right to participate simultaneously in these segments (see 2. 4 Market. Electricity was first made available in Argentina in 1887 with the first public street lighting in Buenos Aires. The Argentine Government's involvement in the electricity sector began in 1946 with the creation of the Dirección General de Centrales Eléctricas del Estado (General Directorate of. Electricity can be generated in two main ways: by harnessing the heat from burning fuels or nuclear reactions in the form of steam (thermal power) or by capturing the energy of natural forces such as the sun, wind or moving water.
