

# Energy independence niamey

## Overview

---

Niger is taking significant strides to address its energy challenges, as new solar projects begin to transform the landscapes of Niamey and Zinder. These initiatives aim to reduce the country's dependence on electricity imports from Nigeria, marking a pivotal shift toward energy self-sufficiency. The Gourou Banda Solar Power Station is a 50 MW (67,000 hp) solar power plant under construction in Niger. This renewable energy infrastructure project is under development by an independent power producer (IPP), under the build-own-operate-transfer (BOOT) model, with support from the International. In a landmark move to strengthen bilateral ties with the Sahel region, Morocco Officially inaugurated the "His Majesty King Mohammed VI" power plant in Niamey's Gamkaley industrial area Niger. DG is an efficient way to reach energy security by minimizing power losses in long and aging transmission. Nigerien authorities have signed a memorandum of understanding with the Canadian company Zimar to build a new oil refinery and petrochemical complex in the Dosso region.
