

# Energy transition tallinn

## Overview

---

The Climate-Neutral Tallinn plan sets out key targets, including the development of a model for community-based renewable energy cooperatives, the promotion of cycling, improved accessibility of public transport, and the comprehensive renovation of apartment buildings in line with. The Climate-Neutral Tallinn plan sets out key targets, including the development of a model for community-based renewable energy cooperatives, the promotion of cycling, improved accessibility of public transport, and the comprehensive renovation of apartment buildings in line with. Tallinn's long-term climate plan aims to achieve climate neutrality in the capital by 2050. This forward-looking strategy, titled Climate-Neutral Tallinn: Sustainable Energy and Climate Adaptation Plan 2030, seeks to reduce the impact of urban life and the economy on the climate, while. As Tallinn moves toward climate neutrality, the Estonian energy provider Utilitas and GEA are setting new standards in district heating. Located on the shores of the Baltic Sea in northern Estonia, Tallinn is a hub for start-ups and high-tech companies, while also drawing. As Estonia's thriving capital, Tallinn has emerged as a hub for innovative energy solutions and sustainable power generation. Our comprehensive Energy Directory connects businesses and residents with the city's top energy providers, from traditional electrical suppliers to cutting-edge renewable. The four high-efficiency heat pumps recover biomass waste heat in Tallinn, cutting fossil fuel use and emissions while supplying clean heating citywide. Operational since Q4 2024, this 240 MWh lithium-ion system supports Estonia's ambitious plan to derive 50% of its electricity from wind.
