

Environmental sustainability jordan

Overview

The country is ramping up its efforts with a clear focus on renewable energy, water conservation, eco-friendly housing, waste recycling, and green tourism. AMMAN — According to the 2025 Global Knowledge Index (GKI), Jordan recorded notable progress in the environment pillar, ranking 23rd in environmental sustainability and 91st in global cooperation. The Kingdom placed ninth globally in local environmental governance, yet ranked far lower in material. Since sustainability is a core pillar of this Vision, Jordan will continue its efforts to achieve the Sustainable Development Goals, compatible with the global approach toward a green economy, and attract investments into sustainable projects which would also facilitate greater access to green. Jordan is embracing a green growth model designed to shape a sustainable future, addressing the economic, social, and environmental challenges facing the country. In a time when economic and environmental challenges are reaching new heights, adopting this approach is not just an option, it's. During the last few decades, sustainable development emerged as a hot topic in many reform agendas and strategic management plans in Jordan. In an interview with Petra, Radaideh highlighted major environmental challenges Jordan faces, including desertification.
