

Environmental sustainability united kingdom

Power Conversion System

- Single-stage three-level modularization
- Multi-branch input to reduce battery series and parallels connection

Overview

The UK falls into the top ranks internationally (rank 3) in the area of environmental sustainability. The 2008 Climate Change Act set binding targets for achieving net-zero emissions by 2050. Recent government policy decisions have pushed back some interim targets. However, the country's overall Environment at a Glance Country Notes feature selected environmental indicators, including a few indicators on countries' socio-economic context to facilitate interpretation. They show the progress that countries have made in addressing environmental issues, including climate change, air quality. Annual review of UK progress from an environmental, climate and nature perspective, drawing on a range of official statistics. Its most recent strategy document, published under the Labour Government, is the 2025.
