

European Energy Storage BESS solar

Overview

European Energy is now building the largest combined solar and battery energy storage (BESS) park in Northern Europe. With Kvosted - a 50 MW, 4-hour (200 MWh) system - we are delivering a project more than four times larger than any existing battery in Denmark and the largest in the Nordics.

MUNICH, Germany (Wednesday 7th May 2025): New analysis reveals another year of record installations for European* battery storage, despite slower year-on-year growth, according to the latest European Market Outlook for Battery Storage. 9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024. After a historic 2025, when global BESS capacity surpassed 250 GW and overtook pumped hydropower, momentum is set to accelerate in 2026.

European Energy Storage BESS solar

Markttrend - BESS in Europe

To ensure a smoother energy transition, Europe must address curtailment, negative electricity prices, and solar price cannibalization with an increased deployment of BESS. Battery ...
