

# Features of double-glass bifacial solar modules

## Overview

---

The double glass makes bifacial panels stronger. They can handle bad weather, water, and rust better. Both. Bifacial solar panels are photovoltaic panels that capture sunlight from both the front and back sides. Unlike traditional monofacial panels that absorb sunlight only from the top surface, bifacial modules use a transparent back layer, allowing them to capture reflected and diffused light from the. Bifacial solar panels represent one of the most significant advances in photovoltaic technology. For businesses and homeowners.
