

Fire at photovoltaic energy storage power station in August

Overview

During the morning of 30 August 2025, the California Department of Forestry and Fire Protection (CAL FIRE) responded to a possible vegetation fire in the area of independent power producer (IPP) Arevon Energy's California Flats solar-plus-storage project. LAS VEGAS (KSNV) — A lithium battery fire broke out at a solar plant in Boulder City Tuesday night. The fire was reported at about 7 p. Tuesday at the Townsite Solar Facility just south of Interstate 11 near U. 95, Boulder City wrote in a social media post. It continued to burn for several. The database compiles information about stationary battery energy storage system (BESS) failure incidents. Other Storage Failure. California Flats is located on the Hearst Corporation's 73,000-acre Jack Ranch. A spokesperson for the company provided the statement, which reads: “ On Saturday, Aug, at approximately 11. Some residents in the area have reported health issues that they claim are related to the fire, and some environmental tests revealed pollutants in the water and ground near where the fire burned. The state's ambitious clean energy buildout has hit an unexpected setback after three different grid batteries caught fire in the span of two months. Firefighters from the Three Mile Bay Fire Co.
