Nominal Energy
200kwh

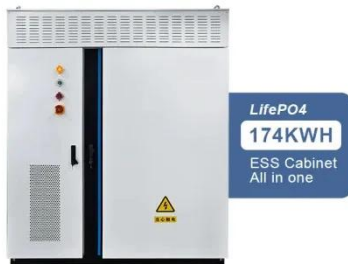

IP Grade
IP55

Overview

The fixed bracket is the most basic form of photovoltaic module bracket. It is suitable for ground solar power stations and rooftop installation, and can be adjusted according to different angle requirements. With the rapid development of renewable energy, the types of solar mounting brackets are becoming more and more diverse. First, let's introduce. A fixed photovoltaic bracket is a bracket that enables the photovoltaic array to receive solar radiation in a fixed manner. They are categorized based on the set tilt angle into: optimal tilt fixed type, adjustable tilt fixed type, and sloped roof fixed type. Optimal Tilt Fixed Type: The.

What Is A Fixed Photovoltaic Bracket?

Whether it is a rainy summer or a cold winter, the fixed bracket can reliably support the photovoltaic modules and reduce the risk of module damage caused by the shaking of the bracket.
