

# Fixed type of photovoltaic integrated energy storage cabinet for base stations

## Overview

---

Integrates solar input, battery storage, and AC output in a compact single cabinet. Offers continuous power supply to communication base stations—even during outages. Highjoule's Indoor Photovoltaic Energy Cabinet delivers seamless power for telecom infrastructure: ✓ Integrated PV + Storage - Harness solar energy and store it intelligently ✓ Ultra-compact indoor design - Fits seamlessly into existing base stations ✓ Smart energy management - Prioritizes clean. The EK indoor photovoltaic energy storage cabinet is a photovoltaic system integration device installed in indoor environments such as communication base stations. Remote diagnosis, performance tracking, and fault alerts through intelligent BMS. It converts the direct current generated by photovoltaic modules into alternating current and realizes functions such as electric energy storage. The Huijue Indoor Photovoltaic Energy Cabinet is a complete high-performance indoor energy storage solution for telecommunication, business, and industry.
