

# Gravity energy storage rabat

**Nominal Capacity**

**280Ah**

**Nominal Energy**

**50kW/100kWh**

**IP Grade**

**IP54**

## Overview

---

A gravity battery is a type of device that stores —the given to an object when it is raised against the force of . In a common application, when sources such as and provide more energy than is immediately required, the excess energy is used to move a mass upward against the force of gravity to generate gravitational potential energy. When customers eventually require more energy tha.

 Gravity (chemical) battery

A gravity battery is a type of energy storage device that stores gravitational energy--the potential energy given to an object when it is raised against the force of gravity. In a common application, when renewable energy sources such as wind and solar provide more energy than is immediately required, the excess energy is used to move a mass upward against the force of gravity to generate gravitational potential energy. When customers eventually require more energy tha...
