

Group 24 vs 35 battery

Overview

Group 35 and Group 24 batteries differ in size, capacity, and application. There are several ranges to choose from, but 24F and 35 group types are the most common ones which are why the debate of 24F vs 35 battery is so prominent. A 24F group size battery is a subgroup of 24. This is a trade association that includes manufacturers, recyclers, distributor, and retailer organizations that supply original and after-market batteries. BCI sets the standards for the. The 24F is slightly larger than the Group 35. So for best results, go with 24F. I. The most immediate difference between the two battery groups lies in their physical dimensions, which dictates whether a battery will fit securely in a specific vehicle tray.
