

# Household energy storage share

## Overview

---

North America holds the largest Household Energy Storage Market share, accounting for 40% of the global market in 2024. The region's growth is driven by the increasing adoption of renewable energy sources, particularly solar power, and the rising demand for energy independence. The household energy storage market is experiencing robust growth, driven by increasing electricity costs, rising concerns about grid reliability, and the expanding adoption of renewable energy sources like solar panels. 232 Billion in 2024 and is projected to reach USD 10. 33% during the forecast period (2024 - 2032).
