

# How big an inverter should I buy for outdoor travel

## Overview

---

The size of inverter generator you need depends on your appliance list, starting watt requirements, and use case. Most campers are well served by 2000–2400W, RV owners typically choose 3500–4500W, and homeowners often prefer 4000–6500W. Choosing the correct generator size is the most important decision when buying an inverter generator. The need for an inverter size chart first became apparent when researching our DIY solar generator build. The thing is - there are so many different sizes available! What is an Inverter?

An inverter is an electronic device that changes DC (direct current) electricity to AC (alternating). An inverter converts Direct Current (DC) from your car battery or solar setup into Alternating Current (AC), which most household appliances use.
