

How many billions of dollars are invested in solar battery cabinet factories

Overview

In just the past three years, more than 380 clean energy manufacturing projects have been announced nationwide, and investment has surged from about \$2. That picture is starting to change. is rapidly building its own battery supply. Battery and solar factories are driving the build-out of domestic cleantech manufacturing in the United States following the passage of the 2022 Inflation Reduction Act, a new report by Bloomberg NEF and the Business Council for Sustainable Energy shows. Together, these companies promise to deliver an annual capacity of close to 1,200 gigawatt-hours before 2030, if each factory reaches. Quarterly investment in clean manufacturing more than tripled—from \$2. 0 billion in Q1 2025—primarily driven by the electric vehicle supply chain.
